Index to MATERIALS & METHODS

Volume 36, July-December 1952, Inclusive

Material covered in this index includes feature articles, MATERIALS & METHODS Manuals, and Engineering File Facts.

Adhesives, What's New In—Oct., p 132
Alloy Steels, Comparative Specifications for (File Fact)—Oct., p 153
Aluminizing Protects Metals at Elevated Temperatures—Oct., p 210

Aluminum and Its Alloys

Aluminizing Protects Metals at Elevated Temperatures—Oct., p 210
Aluminum Alloy Sheet, Bending of (File Fact)—Nov., p 143
Aluminum Coatings Applied to Steel by Many Methods—Dec., p 105
Aluminum Film Cans Automatically Formed and Finished—Dec., p 168
Aluminum Honeycomb Sandwich Material —Dec., p 96
Aluminum, How to Heat Treat—Sept., p 99
Aluminum Impact Extrusions, High Strength —Nov., p 110
Limiting Creep and Stress Rupture Values for Various Ferrous and Nonferrous Materials in Sheet Form (File Fact)—Dec., p 139
Aluminum Bronzes (MATERIALS & METHODS Manual)—Dec., p 119
Black Light Spots Defects in Material—Nov., p 105
Boron Steel Gears, Induction Hardening—Nov., p 121

Brazing (see Welding)

Brazing Vacuum Tight Joints in High Nickel Alloys—Dec., p 117
Carbide Coatings Possible with New Method, Thin, Ductile—Oct., p 112
Carbon and Low Alloy Steel Castings (MATERIALS & METHODS Manual)—Sept., p 119
Carburizing of Steels (MATERIALS & METHODS Manual)—Oct., p 135

Castings and Casting

Carbon and Low Alloy Steel Castings (MATERIALS & METHODS Manual)—Sept., p 119
Magnesium Castings, Rare Earth Metals Improve Elevated Temperature Properties of—July, p 162
Steel Castings, Summary of Standard Specifications for (File Fact)—July, p 131
Titanium, Zirconium Castings Now Practicable—Dec., p 94
Ceramic Fiber, New—Sept., p 94
Chromium Carbide Meets Many Industrial Needs—Aug., p 166
Chromium Stainless Steel, 17%, How to Fabricate—Nov., p 100

Cleaning and Finishing

Aluminizing Protects Metals at Elevated Temperatures—Oct., p 210
Aluminum Film Cans Automatically Formed and Finished—Dec., p 168
Chromium Stainless Steel, 17%, How to Fabricate—Nov., p 100
Magnesium, Forming, Polishing and Machining (File Fact)—Aug., p 133

Coatings and Finishes

Aluminum Coatings Applied to Steel by Many Methods—Dec., p 105
Carbide Coatings Possible with New Method, Thin, Ductile—Oct., p 112
Electroplating Large Complex Shapes—Aug., p 94
Epoxide Resin Coatings—Sept., p 90
Porcelain Enamels—Applications of Tomorrow—Aug., p 100
Rubber-Base Coatings Resist Abrasion at High Aircraft Speeds—Nov., p 184
Silver and Gold Plated Parts Meet Tough Specifications—Nov., p 114
Technical Ceramics, Surface Finishes Improve Performance of—July, p 88
Vinyl Plastisols and Plastigels—Sept., p 104
Cold Forming Stainless Steel Parts (MATERIALS & METHODS Manual)—July, p 101

Copper, Brass and Bronze

Aluminum Bronzes (MATERIALS & METHODS Manual)—Dec., p 119
Lead-Clad Steel and Copper Extend Lead Applications—Oct., p 115
Spring Materials, Properties of Commonly Used (File Fact)—Sept., p 141
Delicate Parts Embedded in Compression Molded, Clear Plastics—Nov., p 108
Electroplating Large Complex Shapes—Aug., p 94

Engineering File Facts

Alloy Steels, Comparative Specifications for —Oct., p 153
Aluminum Alloy Sheet, Bending of—Nov., p 143
Lead-Base Babbitts—Nov., p 145
Limiting Creep and Stress Rupture Values for Various Ferrous and Nonferrous Materials in Sheet Form—Dec., p 139
Magnesium, Forming, Polishing and Machining—Aug., p 133
Manganese-Silicon and Manganese-Nickel-Chromium-Molybdenum Steels— Sept., p 139
Preheat Temperature for Welding Metals and Alloys—Aug., p 131
Spring Materials, Properties of Commonly Used—Sept., p 141
Steel Castings, Summary of Standard Specifications—July, p 121
Steel Specifications, Approximate Equivalent American and British—Aug., p 135
Epoxide Resin Coatings—Sept., p 90
Fixtures for High Production Gas Carburizing, Versatile—Dec., p 109

Forming

Aluminum Alloy Sheet, Bending of (File Fact)—Nov., p 143
Aluminum Film Cans Automatically Formed and Finished—Dec., p 168
Chromium Stainless Steel, 17%, How to Fabricate—Nov., p 100
Cold Forming Stainless Steel Parts (MATERIALS & METHODS Manual)—July, p 101
Magnesium, Forming, Polishing and Machining (File Fact)—Aug., p 133
Shaping Difficult-to-Machine Materials, New Methods for—Oct., p 121
Galvanic Corrosion, How to Control and Stop Costly Failures—Aug., p 83
Gasket Materials—Their Properties and Uses —Aug., p 108
Gas Resistant Elastomer—Oct., p 118
Hafnium Metal—Its Properties and Future—Nov., p 95

Heating and Heat Treatment

Aluminum, How to Heat Treat—Sept., p 99
Boron Steel Gears, Induction Hardening—Nov., p 121
Carburizing of Steels (MATERIALS & METHODS Manual)—Oct., p 135
Fixtures for High Production Gas Carburizing, Versatile—Dec., p 109
Heat Treating Furnace Efficiency, One Way to Increase—Aug., p 106
High-Speed Airplanes of Future Need New Materials—Oct., p 130
High Strength Silicone—Oct., p 118
High Temperature Alloys, General Purpose —Oct., p 103
High Temperature Alloy, New—Aug., p 98

High Temperature Materials

High Temperature Alloys, General Purpose —Oct., p 103
High Temperature Alloy, New—Aug., p 98
How Atomic Radiation Affects Engineering Materials—July, p 75
Powder Metallurgy Parts in High Temperature Applications—Aug., p 87
Hot Machining Methods for Difficult-to-Machine Metals—July, p 98
Hot Pressing, Practical Applications of—July, p 84
How Atomic Radiation Affects Engineering Materials—July, p 75
Indium Alloys Finding Important Commercial Uses—Sept., p 113
Inert-Gas-Shielded Arc Process, Lead Welded by—July, p 97
Laminated Plastics Improve Precision Bearing Performance—Dec., p 99

Lead

Inert-Gas-Shielded Arc Process, Lead Welded by—July, p 97
Lead-Clad Steel and Copper Extend Lead Applications—Oct., p 115
Lead-Base Babbits (File Fact)—Nov., p 145
Limiting Creep and Stress Rupture Values for Various Ferrous and Nonferrous Materials in Sheet Form (File Fact)—Dec., p 139

Machining and Machined Parts

Chromium Stainless Steel, 17%, How to Fabricate—Nov., p 100
Hot Machining Methods for Difficult-to-Machine Metals—July, p 98
Magnesium, Forming, Polishing and Machining (File Fact)—Aug., p 133
Shaping Difficult-to-Machine Parts, New Methods for—Oct., p 121

Magnesium

Magnesium Castings, Rare Earth Metals Improve Elevated Temperature Properties of—July, p 162
Magnesium, Forming, Polishing and Machining (File Fact)—Aug., p 133
Manganese-Silicon and Manganese-Nickel-Chromium Molybdenum Steels (File Fact)—Sept., p 139

Manuals, Materials & Methods

Aluminum Bronzes—Dec., p 119
Carbon and Low Alloy Steel Castings—Sept., p 119
Carburizing of Steels—Oct., p 135
Cold Forming Stainless Steel Parts—July, p 101
Tool Steels—Types, Uses and Treatments—Aug., p 113
Welded and Brazed Parts—Nov., p 123

Nickel and Its Alloys

Brazing Vacuum Tight Joints in High Nickel Alloys—Dec., p 117
High Temperature Alloys, General Purpose —Oct., p 103
Limiting Creep and Stress Rupture Values for Various Ferrous and Nonferrous Materials in Sheet Form (File Fact)—Dec., p 139
Spring Materials, Properties Commonly Used (File Fact)—Sept., p 141

Noble and Other Metals

Hafnium Metal—Its Properties and Future —Nov., p 95
Indium Alloys Finding Important Commercial Uses—Sept., p 113
Silver and Gold Plated Parts Meet Tough Specifications—Nov., p 114
Nondestructive Tests for Finding Defects in Ceramic Parts—Sept., p 116

Nonmetallic Materials and Plastics

Adhesives, What's New in—Oct., p 132
Carbide Coatings Possible with New Method, Thin, Ductile—Oct., p 112
Ceramic Fiber, New—Sept., p 94
Chromium Carbide Meets Many Industrial Needs—Aug., p 166

(Continued on page 264)

Delicate Parts Embedded in Compression Molded, Clear Plastics—Nov., p 108
Gasket Materials—Their Properties and Uses—Aug., p 108
Gas Resistant Elastomer—Oct., p 118
High-Speed Airplanes of Future Need New Materials—Oct., p 130
High Strength Silicone—Oct., p 118
Laminated Plastics Improve Precision Bearing Performance—Dec., p 99
Nondestructive Tests for Finding Defects in Ceramic Parts—Sept., p 116
Nylon Powder Parts, Pressed and Sintered—Oct., p 108
Nylon—Its Properties and Applications—July, p 79
Technical Ceramics, Surface Finishes Improve Performance of—July, p 88
Thermoplastic Sheet, Parts Formed Economically from—Aug, p 92
Thick Polyester Parts, Save Money. . . . Reduce Weight—Nov., p 98
Vinyl Plastisols and Plastigels—Sept., p 104

Plastics (see Nonmetallic Materials)

Porcelain Enamels—Materials Applications of Tomorrow—Aug., p 100

Powder Metallurgy

Hot Pressing, Practical Applications of—July, p 84
Nylon Powder Parts, Pressed and Sintered—Oct., p 108
Powder Metallurgy Parts in High Temperature Applications—Aug., p 87
Preheat Temperatures for Welding Metals and Alloys (File Fact)—Aug., p 131
Radioisotopes Are Finding Industrial Use—Sept., p 87
Rubber-Base Coating Resists Abrasion at High Aircraft Speeds—Nov., p 184
Shaping Difficult-to-Machine Parts, New Methods for—Oct., p 121
Silver and Gold Plated Parts Meet Tough Specifications—Nov., p 114
Spring Materials, Properties of Commonly Used (File Fact)—Sept., p 141
Spun and Drawn Zinc Parts Have Many Applications—Dec., p 102
Steel Castings, Summary of Standard Specifications (File Fact)—July, p 121

Steels

Alloy Steels, Comparative Specifications for (File Fact)—Oct., p 153
Boron Steel Gears, Induction Hardening—Nov., p 121
Carbon and Low Alloy Steel Castings (MATERIALS & METHODS Manual)—Sept., p 119
Carburizing of Steels (MATERIALS & METHODS Manual)—Oct., p 135
Chromium Stainless Steel, 17%, How to Fabricate—Nov., p 100
High-Speed Airplanes of Future Need New Materials—Oct., p 130
High Temperature Alloys, General Purpose—Oct., p 103
Lead-Clad Steel and Copper Extend Lead Applications—Oct., p 115
Limiting Creep and Stress Rupture Values for Various Ferrous and Nonferrous Materials in Sheet Form (File Fact)—Dec., p 139
Manganese - Silicon and Manganese - Nickel-Chromium Molybdenum Steels (File Fact)—Sept., p 139
Spring Materials, Properties of Commonly Used (File Fact)—Sept., p 141
Steel Castings, Summary of Standard Specifications (File Fact)—July, p 121
Steel Specifications, Approximate Equivalent American and British (File Fact)—Aug., p 135
Titanium-Boron Alloy Steel, New—Sept., p 96
Tool Steels—Types, Uses and Treatments (MATERIALS & METHODS Manual)—Aug., p 113
Surface Roughness, Which Method to Evaluate?—Dec., p 89
Technical Ceramics, Surface Finishes Improve Performance of—July, p 88

Testing and Inspection

Black Light Spots Defects in Materials—Nov., p 105
Nondestructive Tests for Finding Defects in Ceramic Parts—Sept., p 116
Radioisotopes Are Finding Industrial Use—Sept., p 87
Surface Roughness, Which Method to Evaluate?—Dec., p 89
Thermoplastic Sheet, Parts Formed Economically from—Aug., p 92
Thick Polyester Parts Save Money . . . Reduce Weight—Nov., p 98
Titanium Alloys, Flash Welding—Sept., p 206
Titanium-Boron Alloy Steel, New—Sept., p 96
Titanium and Zirconium Castings Now Practicable—Dec., p 94

Titanium, Zirconium and Tantalum

High-Speed Airplanes of Future Need New Materials—Oct., p 130
Titanium Alloys, Flash Welding—Sept., p 206
Titanium and Zirconium Castings Now Practicable—Dec., p 94
Tool Steels—Types, Uses and Treatments—Aug., p 113
Vinyl Plastisols and Plastigels—Sept., p 104
Welded and Brazed Parts (MATERIALS & METHODS Manual)—Nov., p 123

Welding and Joining

Adhesives, What's New in—Oct., p 132
Brazing Vacuum Tight Joints in High Nickel Alloys—Dec., p 117
Chromium Stainless Steel, 17%, How to Fabricate—Nov., p 100
Indium Alloys Finding Important Commercial Uses—Sept., p 113
Inert-Gas-Shielded Arc Process, Lead Welded—July, p 97
Preheat Temperatures for Welding Metals and Alloys (File Fact)—Aug., p 131
Titanium Alloys, Flash Welding—Sept., p 206
Welded and Brazed Parts (MATERIALS & METHODS Manual)—Nov., p 123

Zinc

Spun and Drawn Zinc Parts Have Many Applications—Dec., p 102
